

**AIAM cares
about your
health.**

**MASSAGE THERAPY,
REFLEXOLOGY,
ACUPUNCTURE,
CUPPING & CHINESE
HERB CLINICS ARE
OPEN**

Our students, interns, faculty
and licensed professionals
welcome you.

AIAM's engineering controls make our building air safer.

We love our AIAM Family and want everyone healthy and safe.

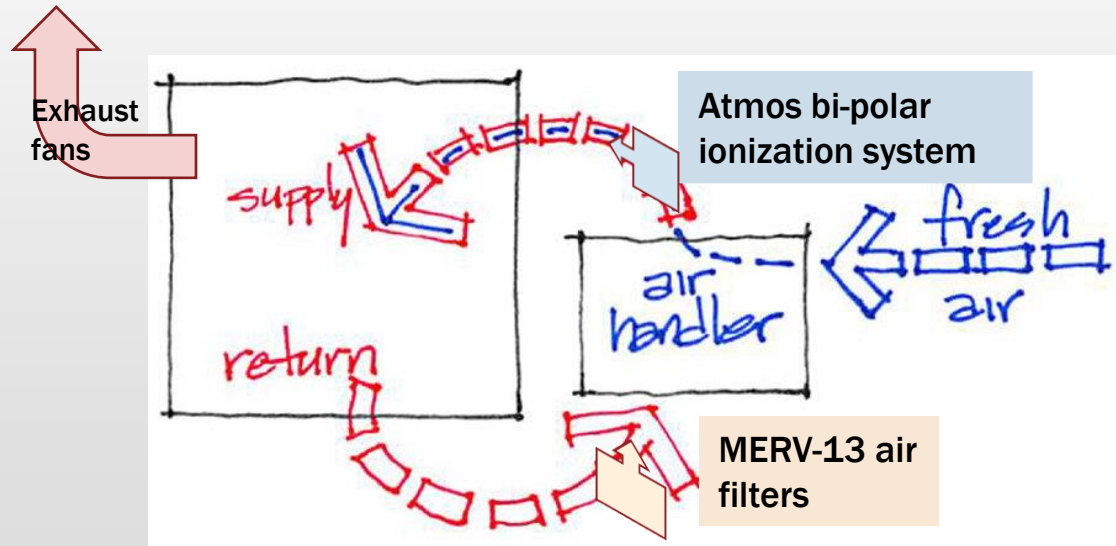

- Air changes every 6 minutes
- More fresh and ionized air
- Highly filtered and less old air

Schedule your Massage Therapy, Reflexology, Acupuncture, and Chinese Herb appointments today! Open 7 days a week

AIAM's engineering controls make our building air safer.

AIAM's Heating Venting Air Conditioning system overview.

Air Handlers – AIAM has huge commercial air handlers.

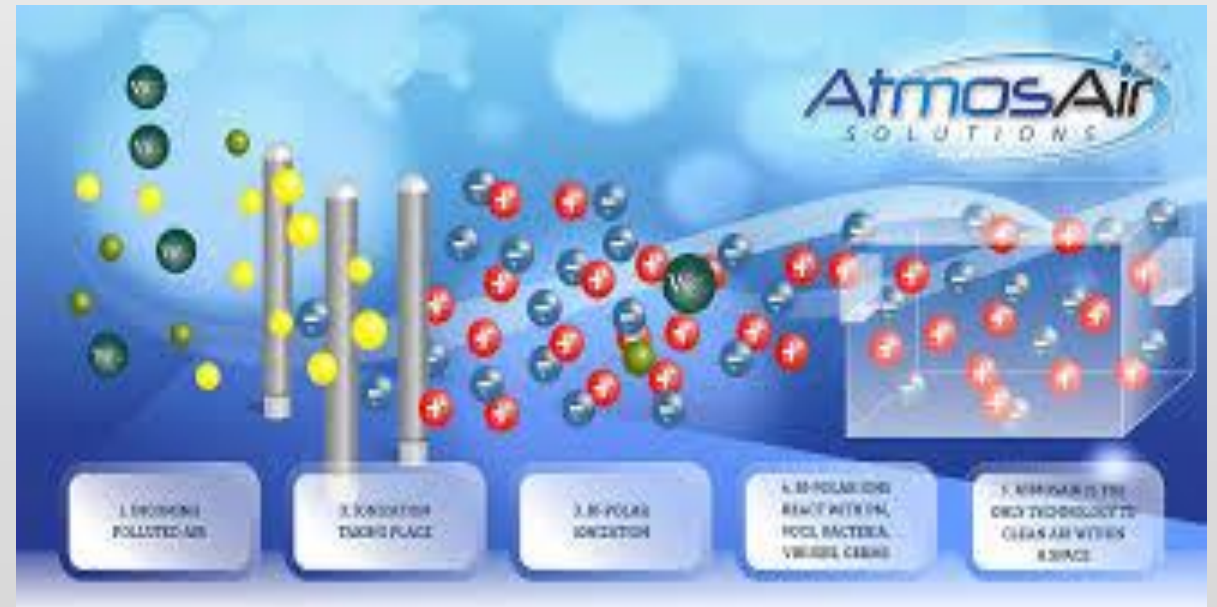

- AIAM's air handlers are programmed at the maximum speed. **This completely changes the air in our building every six minutes.**
- AIAM's air handlers pull in a maximum volume of fresh air and put out that same amount of return air from each room.
- AIAM's air handlers are regularly cleaned and maintained.

Supply (INCOMING) air in each room goes through an ionization system

AIAM's Atmos Air bi-polar ionization system makes air that actually cleans the air in each room.

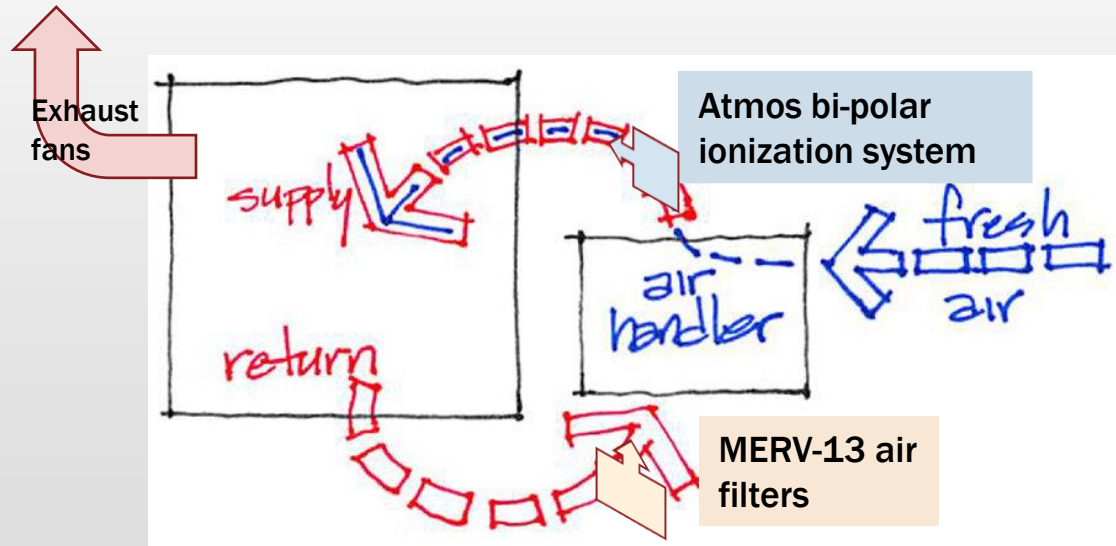

It cleans the air like nature does, with ions and no side effects.

AIAM's engineering controls make our building air safer.

AIAM's Heating Venting Air Conditioning system overview.

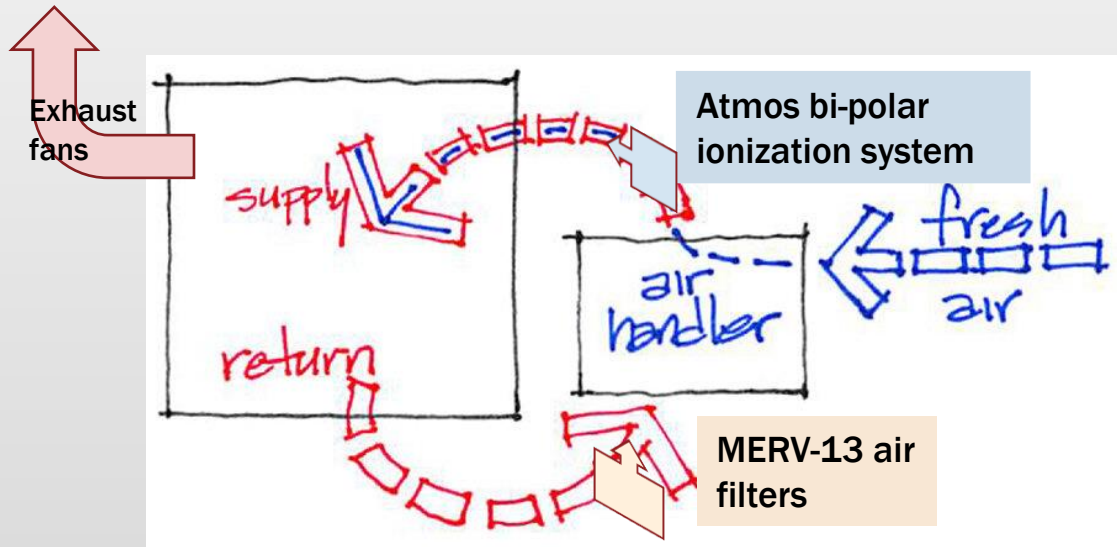

Atmos bi-polar ionization system cleans the supply air

- Reduced dust and mold particles. Bipolar ions that bond with contaminants gain size and mass and drop to the floor, or return to the filter, making them easily cleaned from the air we breathe.
- Reduced odors. Bipolar ions break down odors at their source and eliminate them — no masking or diluting!
- Reduced VOCs (Volatile Organic Compounds). Bipolar ions break down toxic gasses and compounds from dangerous chemicals such as cleaning products, pesticides, paints, solvents, mold, mildew and more.
- Reduced bacteria and viruses. Because bipolar ions negatively affect the DNA of bacteria and viruses, AIAM protects the AIAM family from illness and disease within the AIAM Building.

AIAM's engineering controls make our building air safer.

AIAM's Heating Venting Air Conditioning system overview.

People breath and the return air carries that breath out and through MERV-13 air filters.

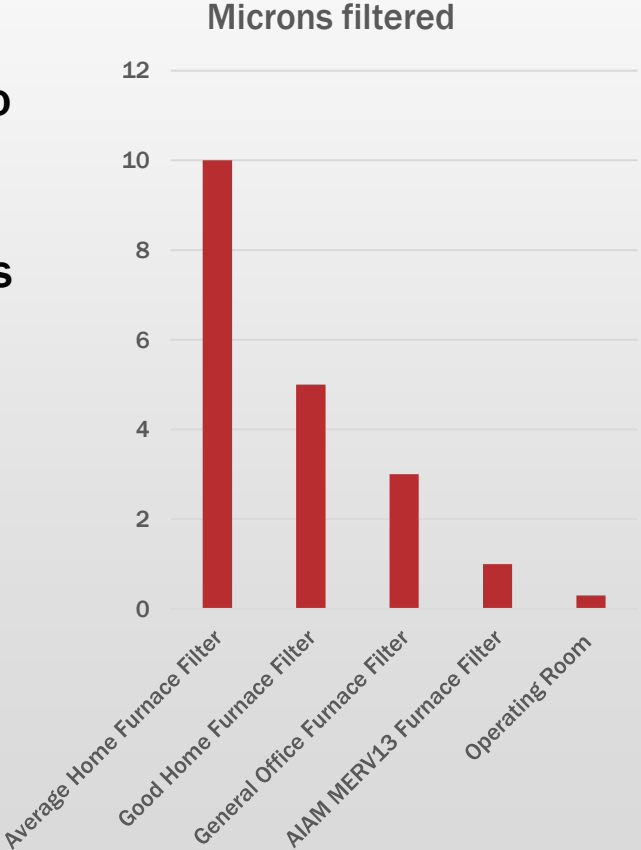

MERV 13 air filters remove particulates to the size of 1 micron – bacteria, droplets, and viruses - from the return air.

MERV Rating			
1-4	5-8	9-12	13-16
Typical particles trapped by filter			
<ul style="list-style-type: none"> • Pollen • Dust mites • Standing dust • Spray paint dust • Carpet fibers 	<ul style="list-style-type: none"> • Pollen • Dust mites • Standing dust • Spray paint dust • Carpet fibers • Mold spores • Hair spray • Fabric Protector • Cement Dust 	<ul style="list-style-type: none"> • Pollen • Dust mites • Standing dust • Spray paint dust • Carpet fibers • Mold spores • Hair spray • Fabric Protector • Cement Dust • Humidifier dust • Lead dust • Auto emissions • Milled flour 	<ul style="list-style-type: none"> • Pollen • Dust mites • Standing dust • Spray paint dust • Carpet fibers • Mold spores • Hair spray • Fabric Protector • Cement Dust • Humidifier dust • Lead dust • Auto emissions • Milled flour • Bacteria • Most tobacco smoke • Proplet nuclei (sneeze)

AIAM indoor air quality

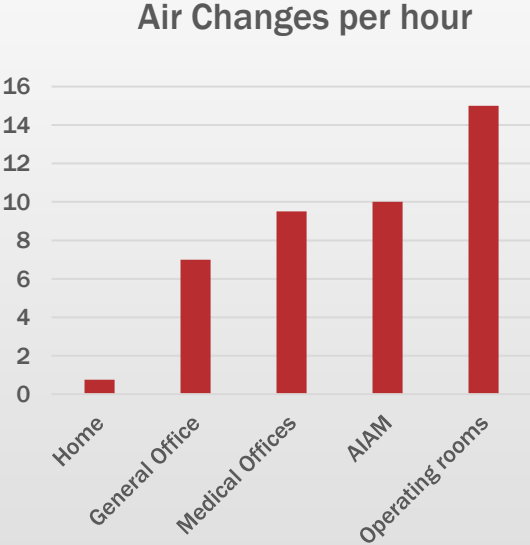

AIAM MERV13 filters take out small airborne particles to 1 micron.

Respiratory droplets are generally larger than 1 micron.

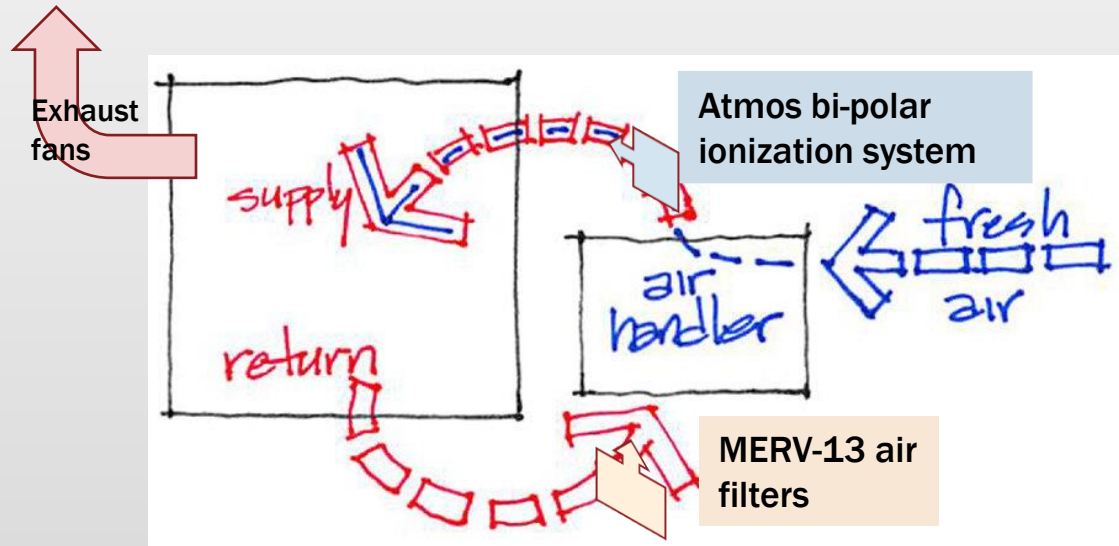

AIAM has 10 building air changes per hour.

AIAM clinic and bathrooms have an additional 8 room air changes per hour provided by exhaust fans.

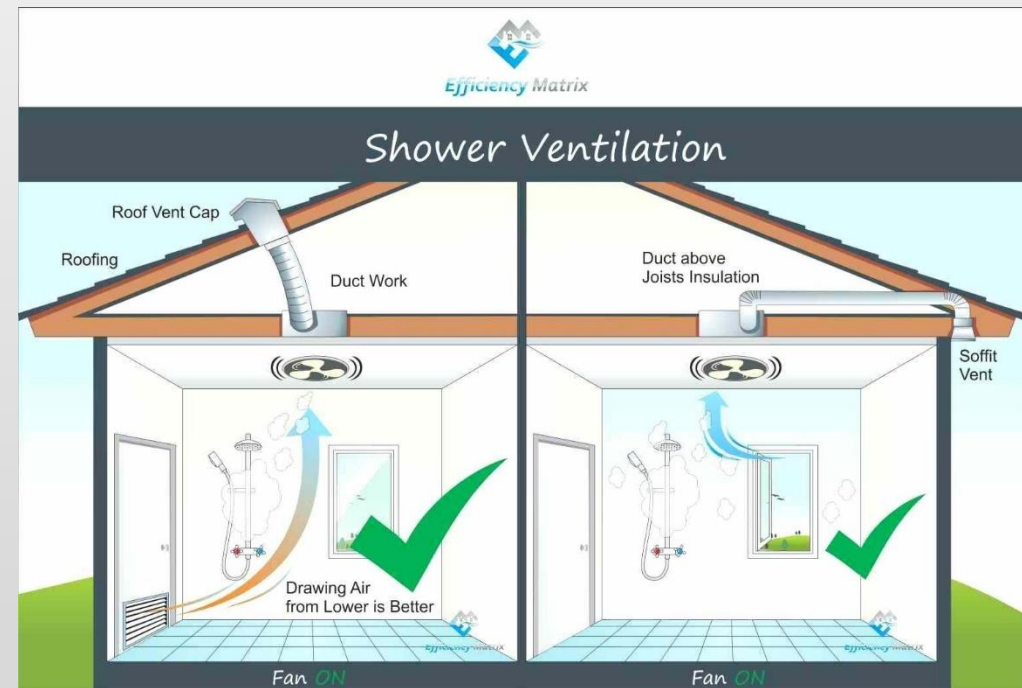

AIAM's engineering controls make our building air safer

AIAM's Heating Venting Air Conditioning system overview.

People breath and the exhaust fans pull some of that breath out of the building.

Exhaust fans in bathrooms and patient treatment rooms remove additional air from AIAM.

AIAM's engineering controls make our building air safer.

We love our AIAM Family and want everyone healthy and safe.
